

Kindergarten Education Scheme

School-based Learning Activity of Chinese Culture

Display Form

HKSPC Butterfly Estate Nursery School

Name of School

2024-2025

School Year

N3

Grade Level

Name of Activity

Visit Produce Green Foundation

Objective(s)

- Through visiting rice fields, children can learn about the process of growing rice in China and know that rice is one of the main grains in China.
- Children can learn about the structure of the grain, its growth and planting methods.
- Children can use rice straw to make different shapes of straw handicrafts.

Brief Descriptions:

The activity was lead by a Green Field Foundation instructor. The children visited a rice field and learnt about the growth of rice in the rice field. Afterwards, the instructor showed the children the rice processing machines, introduced and explained the process of rice after harvesting, and explained different natural fertilisers and functions. Finally, the teacher returned to the classroom to introduce the types of rice and make scarecrows and brooms with the straw demonstration.
