To help children learn more about the astronomy, teacher has arranged children to visit the "Hong Kong Society For The Protection Of Children S.T.E.A.M. For Children Wonderland" to expose them to the knowledge of The Earth and other planets, as well as the relationships among the earth and other planets. To extend the children's learning interest, teacher has prepared an art and craft activity to make a beautiful and starry place by baking soda and vinegar. When they finished their works, they were willing to share with others. They enjoyed the art and craft activity so much.
