

2024-2025 年度

N.2 班中華兩爬動物全接觸講座

Class N.2 Chinese Amphibians and Reptiles Full Contact Lecture

班級(Class)：N2

活動地點(Location)：本校(School)

活動目標(Target)：

1. 認識中華爬行動物，培養幼兒愛護動物的情操，盡公民責任保護瀕臨絕種的動物。
2. 認識具國家代表性的動物。
3. 認識生態保育的方法。

1. To learn about Chinese reptiles, cultivate children's compassion for animals, and fulfil civic responsibilities to protect endangered species.
2. To learn about animals that represent the country.
3. To learn about methods of ecological conservation.

活動目標 (Activity Overview):

老師於專題研習「寵物」的課堂活動中，與幼兒一同探討了可飼養寵物的特質與生活習性，引導幼兒理解動物與人類的共生關係，並建立照顧寵物應有的責任與同理心。為深化學習體驗，老師特別邀請香港兩棲及爬蟲協會導師到校舉行互動講座，透過解說及實物接觸，讓幼兒認識中華花龜、球蟒等具國家代表性的兩棲爬蟲動物，同時設計動物互動環節啟發感知探索。活動旨在培養幼兒對本土生態物種的認知，並從親身接觸中萌生保護瀕危動物的公民意識。

During the "Pets" project-based learning activity, the teacher discussed with the children the characteristics and living habits of pets that can be kept at home. The discussion aimed to help children understand the symbiotic relationship between animals and humans, while fostering a sense of responsibility and empathy in caring for pets. To deepen the learning experience, the teacher invited an instructor from the Hong Kong Society of Herpetology Foundation to conduct an interactive talk at the school. Through explanations and hands-on interactions, the children were introduced to amphibians and reptiles found in our country, such as the Chinese pond turtle and ball python. The session also included interactive activities with animals to inspire sensory exploration. The purpose of the activity was to cultivate the children's understanding of local ecological species and to nurture a sense of civic responsibility in protecting endangered animals through direct engagement.
