Name of School

2023-2024

School Year

N4

Grade Level

Name of Activity

Children's Astronomy Exploration Activity: Earth and Her Neighbors.

Objective(s)

- Let the children be immersed under a planetarium dome, watching projected celestial bodies to understand the operations of the moon and Earth, as well as the moon's relationship with us."
- Through creative activities, children are enabled to create planet models with art media, expressing their personal feelings and achievements artistically.

Brief Descriptions:

The activity was divided into two parts, the first part being an astronomy session where the children entered the planetarium to watch projected celestial bodies and learned about the workings of the moon and Earth, as well as their relationship with us. The second part was a creative activity where teachers helped children create planet models by using art media. During this process, children explored by adding baking soda and food coloring, then introducing vinegar to produce bubbles, observing and discovering the scientific reactions involved. Lastly, the children made their own planets.
