HKSPC Thomas Tam Nursery School

Name of School

2024-2025

School Year

N4

Grade Level

Name of Activity

Visit Hong Kong Palace Museum

Objective(s)

- Understanding the development and evolution of China-Pottery during the early, middle, and late Ming Dynasty through observing Ming Dynasty ceramic treasures.
- Deepening knowledge and appreciation of traditional Chinese painting and historical culture through observing treasured paintings.
- Gaining an understanding of ancient Chinese culture.

Brief Descriptions:

In the project study of 'China-Pottery', children learned that clay can be used as a material to make ceramics. After participating in various exploratory activities, they developed an interest in ceramics. Therefore, this visit to the Hong Kong Palace Museum provided an opportunity for children to deepen their understanding of ancient Chinese ceramic culture through observation.

During the visit, the children were highly engaged and focused. The museum featured various interactive zones, including a ceramic-making video area and multi-art experience zones. The learning content was diverse and covered multiple aspects, allowing the children to gain a lot from the experience and making it hard for them to leave.

In addition to learning about ceramics from different dynasties, the children also gained a deeper understanding of ceramic patterns, such as floral designs and animal

motifs, and saw some precious artworks. Both teachers and children benefited greatly from this activity.
