2024-2025

School Year

N4

Grade Level

Name of Activity

Exploring Astronomy: Earth and Her Neighbors

Objective(s)

- Through activities, immerse children in an astronomical dome to watch projected celestial images and learn about the eight planets.
- Through creative activities, allow children to create planets using artistic materials and share their personal feelings and insights.

Brief Descriptions:

- Children are immersed in an astronomical dome, where the instructor introduces each planet in the solar system one by one. The projected celestial images change according to the planet being discussed, allowing children to focus on listening to the explanations while observing the shapes and names of the planets. Let them learn about the eight planets and enhances their interest in astronomy."
- Teacher encourages children to try making planets using baking soda and paint. During the process, children create while exploring the texture of the baking soda and adding different colors of paint to it to create their planets.
