

2024-2025 年度 N.3 班參觀香港海洋公園 Hong Kong Ocean Park Activity

班級(Class): N.3

參觀地點(Location): 香港海洋公園 Hong Kong Ocean Park

活動目標(Target):

1. 幼兒能了解大熊貓的居住環境，生活習性。
2. 幼兒能認識四川動物各種身體特徵與棲息地。
3. 能培養幼兒保護大熊貓及其他動物的意識。

1. Children can understand the living environment and habits of pandas.
2. Children can recognize the various physical characteristics and habitats of Sichuan animals.
3. Children can develop an awareness on the need to protect pandas and other animals.

活動簡介(Activity Overview)

為讓幼兒了解大熊貓的居住環境,本校於 2025 年 3 月 6 日(星期四)帶領 N.3 班幼兒到香港海洋公園學院進行〈大熊貓跡中尋〉活動, 幼兒在活動中認識了大熊貓的身體特徵 (手掌中的偽拇指), 生活習性 (一天吃竹子的份量如同人一天吃 20 碗飯), 亦透過觀賞大熊貓了解大熊貓的生活環境

To enhance children's understanding on the living environment of pandas, our school took the N.3 class to the Hong Kong Ocean Park Academy on March 6, 2025 (Thursday) for the activity "The PANtastic Footprints". During this activity, children learned about the physical characteristics of pandas (such as the pseudo thumb in their paws) and their habits (the amount of bamboo they eat in a day is equivalent to 20 bowls of rice consumed by a human.). They also learned about the living environment of pandas by observing them.
