

活動對象 Target: N4 幼兒 children

活動目標 Objectives:

1. 初步認識中華文化-百子櫃、中藥。
2. 加深幼兒對種植的認知，並感受農夫耕種的辛勞。
3. 藉著體驗式學習活動培養幼兒愛護植物的態度。

- Introduce Chinese culture - Hundred Chinese Medicine Cabinet.
- Deepen children's understanding of planting and help them appreciate the hard work of farmers.
- Foster children's attitude of caring for plants through experiential learning activities.

活動簡介 Brief Introduction:

老師透過故事及活動體驗，讓幼兒感受農夫耕種的辛勞。老師向幼兒展示不同的用具並介紹其名稱及活動步驟。幼兒進行了不同的探索活動，分別為：大自然拓印手巾、大自然拼砌畫、製作花盆、探索香氣植物、試飲滋潤中式茶等。過程中幼兒以五感探索不同的植物，觀察植物的特徵，例如：色澤、形狀和脈絡紋理等，並欣賞不同植物的顏色、大小、形狀。在體驗式學習活動中，幼兒認識到不同的中式茶，延伸至製作茶包並派發給其他班級的幼兒

The teacher used storytelling and hands-on activities to help children appreciate the hard work of farmers. Various tools were introduced, with their names and usage steps explained. The children engaged in a range of exploratory activities, including creating nature-printed handkerchiefs, assembling nature-inspired artwork, crafting flower pots, exploring aromatic plants, and sampling soothing Chinese teas. Through these activities, the children used their five senses to explore different plants, observing characteristics such as color, shape, and vein patterns. They admired the diverse colors, sizes, and forms of the plants. As part of this experiential learning, the children also learned about various types of Chinese tea, which extended into making tea bags and distributing them to peers in other classes.
