

# Kindergarten Education Scheme

## School-based Learning Activity of Chinese Culture

### Display Form

HKSPC Butterfly Estate Nursery School

Name of School

2025-2026

School Year

N2

Grade Level

### Name of Activity

Visit Lions Nature Education Centre

### Objective(s)

- Through planting activities, children learn that growing crops is an important part of traditional Chinese culture. They also develop an understanding of the meaning behind 「粒粒皆辛苦」 cultivating an attitude of cherishing food.
- Children learn to appreciate and value the natural environment and natural resources.
- By interacting with nature, children explore their surroundings using multiple senses.

### Brief Descriptions:

Through participating in the outdoor activity “I Am a Little Farmer,” children imitate the work of farmers, allowing them to enjoy the fun of farming and experience the planting process. This helps them understand the meaning of 「粒粒皆辛苦」 and express to teachers that they will cherish food. In addition, by visiting the Agricultural Gallery and Fisheries Gallery, children observe different fish specimens and the growth process of seeds, gaining knowledge about the diversity of the natural environment and natural resources. At the same time, through planting activities, children increase their interaction with nature—such as observing the color of soil, touching the earth, and exploring plant scents with their noses—engaging in rich sensory exploration.

### Record of Activity (E.g. Children’s Work / Photos / Videos of the activity)
