School-based Learning Activity of Chinese Culture
Display Form**

**Hong Kong Society for the Protection of Children
Cheung Sha Wan Nursery School**

Name of School

2025-2026

School Year

N3

Grade Level

Name of Activity

Experiential Learning Week: Environmental Pioneers

Objective(s)

- Through activities, children learn how to collect and sort recyclable items, understand the characteristics of different materials, learn to cherish the things and Earth's resources, fostering values of "gratitude" and "appreciation."
- By participating in hands-on recycled paper-making activities, children can experience the process of turning waste into reusable paper, understanding the basic concept of "recycling."
- Through visits to "So Uk Recycling Store" children can learn to name different types of recyclable items and explore ways to protect the Earth, developing an attitude of valuing resources and caring for the environment.

Brief Descriptions:

- Through the story "The Earth Needs You," children learn the importance of protecting the planet and are guided to collect recyclable items in the classroom, like waste paper, plastic bottles, and paper boxes, while learning basic sorting methods.
- During recycled paper activities, materials such as waste paper, clean water, mixing tools, and mesh frames are provided, allowing children to experience the making process, observe the transformation of paper from wet to dry, and understand the principle of material reuse.
- Children participate in outdoor activities, visiting "So Uk Recycling Store" for recycling, learning about different recycling categories (like paper, plastic, metal, glass), practicing sorting and disposing of recyclables.

Record of Activity (E.g. Children's Work / Photos / Videos of the activity)
